* Because the blend price adjusted for location was at or below the Class III price in certain zones in some markets in the East North Central, West North Central, and Pacific regions, handlers elected not to pool an estimated 200 million and 700 million pounds in August 1995 and 1994, respectively, that normally would have been pooled under these orders. The total estimated amounts of milk not pooled for this reason through the month of August are: for 1995, 1.5 billion pounds; and for 1994, 2.9 billion pounds. 1/ End-of-year figure. Remaining annual statistics are for all markets in effect during any part of the year, except for the Michigan Upper Peninsula market, for which all the data were restricted and thus excluded through 1992. 2/ Represents changes over the previous year. Percentages computed from unrounded numbers. Data for 1992 have been adjusted to a 365-day basis before computing percent changes. 3/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period 1994-95, and for which the data were not affected significantly by marketing area changes; all markets are comparable. 4/ The decrease in markets results from the merger of the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, and Greater Louisiana marketing areas. See "Summary of Federal Milk Order Actions, July 1995" on page 56. 5/ Average or total.

1/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources. Due to a change in classification procedures that was effective July 1, 1993, sour cream, yogurt, and eggnog are now reported on a used-to-produce basis. Previously, most orders reported data for these products on a disposition basis.

2/ Plain, flavored, and miscellaneous whole milk products.

3/ Plain, solids added, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

4/ Light, heavy, and sour cream and cream dips.

5/ In addition to listed fluid milk and cream products, includes eggnog and yogurt.

6/ Represents changes over the previous year. Percentages are based on the data for all markets combined. Data for 1992 are adjusted to a 365-day basis before computing percent changes.

7/ Represents the data for all Federal milk order markets, except for New York-New Jersey. For percent changes based on comparable markets, see tables 15 and 16. The decrease in markets in July results from the merger of the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, and Greater Louisiana marketing areas. See "Summary of Federal Milk Order Actions, July 1995" on page 56.

*Due to the unusual price relationships and/or qualification circumstances in some markets in 1990-1994 and 1995, handlers elected not to pool significant volumes of milk that normally would have been pooled under Federal milk orders. Because this milk would have been classified as Class III under the orders, the utilization in butter, cheese, and nonfat dry milk production for these years was affected.

1/ Includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to non-order plants for processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are preliminary and partially estimated.

2/ In addition to listed manufactured products, includes milk, skim milk, and cream used in other manufactured dairy products: e.g. cottage cheese, evaporated milk, condensed milk, dried products, and aerated cream; and milk, skim milk, and cream used in other food and non-food products. The total also includes dumped or spilled milk and plant loss.

3/ Represents changes over the previous year. Percentages are based on the data for all markets combined. These changes are based on pounds of butterfat, except for nonfat dry milk, which are based on pounds of skim milk. Data for 1992 are adjusted to a 365-day basis before computing percent changes.

4/ Represents the data for all Federal milk order markets, except for New York-New Jersey. For percentage changes based on comparable markets, see tables 18 and 19. The decrease in markets in July results from the merger of the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, and Greater Louisiana marketing areas. See "Summary of Federal Milk Order Actions, July 1995" on page 56.

1/ In-area sales include total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

2/ Plain, flavored, and miscellaneous whole milk products.

3/ Plain, solids added, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

4/ Represents changes over the previous year. Percentages are based on the same group of markets comparable in both years. Data for 1992 are adjusted to a 365-day basis before computing percent changes.

5/ Adjusted to eliminate variation in data to calendar composition and seasonality.

6/ Represents the data for all Federal milk order markets through June. Beginning in July, excludes New York-New Jersey, Also beginning in July, excludes Southeast. See "Summary of Federal Milk Order Actions, July 1995" on page 56.

^{1/} Prices are for 100 pounds of milk of 3.5 percent butterfat content. Prices are listed generally for the major city in the marketing area; see footnotes on pages 42 and 43 for these locations. ^{2/} The fluid differential is the amount added to the Basic Formula Price to determine the Class I price. The Basic Formula Price is the base month Minnesota-Wisconsin price for the second preceding month updated with a product price formula. See Table 27. The fluid differentials shown for New England, New York-New Jersey, and Michigan Upper Peninsula reflect location adjustments. The differentials specified in the orders are: New England - \$2.52, New York-New Jersey - \$2.42; and Michigan Upper Peninsula - \$1.15. ^{3/} Effective July 1, 1995, the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, Greater Louisiana markets were merged to form the Southeast order (order #7). See "Summary of Federal Milk Order Actions, July 1995" on page 56. The data for 1994 are for the Georgia market.

FOOTNOTES FOR TABLES 2 AND 3.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. All averages are weighted.

2/ For those markets which have base-excess plans (see table 21), the prices represent a weighted average of the base and excess prices. For those markets which have multiple component pricing (see table 22), the prices represent the Basic Formula Price plus the weighted average differential price computed under the order.

3/ For the 27 marketing areas where it currently is in effect, this price is applicable to producer milk used to produce nonfat dry milk.

4/ Zone 1 (Boston). Price at 201-210 mile zone: Class I and blend, 72 cents less. Class I and blend price at Hartford, 10 cents less.

5/ New York metropolitan area. Price at 201-210 mile zone: Class I and blend, 72 cents less; Class II and Class III, 8 cents less.

6/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct delivery differential applicable to milk delivered to the Philadelphia area.

7/ Charlotte.

8/ Bristol, Chattanooga, and Knoxville.

9/ New marketing area. Effective July 1, 1995, the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, and Greater Louisiana marketing areas were merged to form the Southeast marketing area. See "Summary of Federal Milk Order Actions, July 1995" on page 56. The expansion in the marketing area did not result in a significant increase in the number of regulated handlers. Therefore, the new marketing area will be comparable. The figures for 1994 are weighted averages of the data for the five merged markets.

10/ Zone 7 (Atlanta and Birmingham).

11/ Jacksonville and Tallahassee.

12/ Miami.

13/ Zone II (Marquette).

14/ Individual handler pool. Blend prices are weighted average of all handlers.

15/ Zone 1 (Detroit). Price excludes a 10-cent direct delivery differential applicable to milk delivered to the Detroit metropolitan area.

16/ Cleveland and Pittsburgh.

17/ Zone 3 (Columbus). Class I and blend price at Cincinnati (Zone 4) 7 cents more.

18/ Indianapolis.

19/ Zone 1 (Chicago). Class I and blend price at Milwaukee (Zone 4) 9 cents less.

20/ Peoria.

FOOTNOTES FOR TABLES 2 AND 3. -CONTINUED

21/ Base Zone (Alton). Class I and blend price at Carbondale (Southern Zone) and at St. Louis 9 cents more.

22/ Zone 1 (Minneapolis).

23/ Zone 1 (Des Moines). Class I and blend price at Rock Island, Ill., 7 cents less; and at Waterloo, 17 cents less.

24/ Zone 1 (Omaha).

25/ Kansas City and Topeka.

26/ Figures exclude, where applicable, Eastern South Dakota, Black Hills, and Western Colorado; the data used to weight the monthly prices were restricted. The applicable figures are:

FOOTNOTES FOR TABLES 4 THROUGH 11.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. See footnotes on pages 42 and 43 for location at which price is reported. All averages are weighted.

2/ New marketing area. Effective July 1, 1995, the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, and Greater Louisiana marketing areas were merged to form the Southeast marketing area. See "Summary of Federal Milk Order Actions, July 1995" on page 56. The new marketing area will be comparable. The figures for 1994 are the summation or weighted averages of the data for the five merged markets.

3/ Figures exclude, where applicable, Eastern South Dakota, Black Hills, and Western Colorado; the data used to weight the monthly prices are restricted.

4/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period 1994-95, and for which the data were not affected significantly by marketing area changes; all markets are comparable.

5/ In these marketing areas, milk was not pooled due to unusual price relationships. See "*" on page 4.

6/ The data for these marketing areas are combined in order to mask restricted data. See table 1 for complete marketing area name.

FOOTNOTES FOR TABLES 12 THROUGH 19.

1/ In-area sales include total sales in each of the areas by handlers regulated under the respective order, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

2/ Plain, flavored, and miscellaneous whole milk products.

3/ Plain, fortified, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

4/ Comparable markets are markets where the orders were in effect the entire period 1994-95, and for which the data were not affected significantly by marketing area changes; all markets are comparable.

5/ Excludes New York-New Jersey.

6/ Figures adjusted to eliminate variation in data due to calendar composition.

7/ The data for this market are estimated.

8/ New marketing area. Effective July 1, 1995, the Georgia, Alabama-West Florida, New Orleans-Mississippi, Central Arkansas, and Greater Louisiana marketing areas were merged to form the Southeast marketing area. See "Summary of Federal Milk Order Actions, July 1995" on page 56.

9/ Comparable markets are markets where the orders were in effect the entire period 1994-95, and for which the data were not affected significantly by marketing area changes.

Excludes Southeast; see 8/.

10/ See table 12 for marketing areas included; excludes Southeast.

11/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources. However, sour cream, yogurt, and eggnog are reported on a used-to-produce basis.

12/ See table 12 for marketing areas included; excludes New York-New Jersey. Percent changes are based on the same groups of comparable markets; see 4/.

13/ Light, heavy, and sour cream, and cream dips.

14/ In addition to listed fluid milk and cream products, includes yogurt and eggnog.

15/ Includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants, as well as milk diverted and shipped to non-order plants for processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are preliminary and partially estimated.

16/ In addition to listed manufactured products, includes milk, skim milk, and cream used in other manufactured dairy products, e.g., evaporated milk, condensed milk, dried products, aerated cream, and skim milk equivalent used to fortify fluid milk products; milk, skim milk, and cream used in other food products as well as used in animal feed, dumped or spilled, plant loss, and miscellaneous products.

17/ Percent changes over the previous year are based on the same group of comparable markets--markets where the orders were in effect the entire period 1994-95, and for which the data were not affected significantly by marketing area changes; all markets are comparable. These changes are based on pounds of butterfat, except for nonfat dry milk which are based on pounds of skim milk.

18/ Restricted.

19/ The marketing areas in which milk was not pooled in June 1994 and 1995 due to unusual price relationships were in these regions. See "*" on page 6.

20/ The marketing areas in which milk was not pooled in July 1994 and 1995 due to unusual price relationships were in these regions. See "*" on page 6.

^{1/} This pricing provision was in effect in 38 marketing areas through March 1995. Three separate differentials and Class II prices were computed and are listed according to the group of marketing areas to which each applied. These groups of marketing areas are: Group A: Alabama-West Florida, Black Hills (see ^{5/}), Carolina, Central Arizona, Central Arkansas, Central Illinois, Chicago Regional, Eastern Colorado, Eastern Ohio-Western Pennsylvania, Eastern South Dakota, Georgia, Great Basin, Greater Kansas City, Greater Louisiana, Indiana, Iowa, Louisville-Lexington-Evansville, Michigan Upper Peninsula, Middle Atlantic, Nebraska-Western Iowa, New England, New Mexico-West Texas, New Orleans-Mississippi, New York-New Jersey, Ohio Valley, Paducah, Southern Illinois-Eastern Missouri, Southern Michigan, Southwest Plains, Southwestern Idaho-Eastern Oregon, Tennessee Valley, Texas, Upper Midwest, and Western Colorado; Group B: Southeastern Florida, Tampa Bay, and Upper Florida; Group C: Pacific Northwest. ^{2/} Price at 3.5 percent butterfat content for the second preceding month. ^{3/} Total weighted change in gross values of milk used to produce Cheddar cheese and butter/nonfat dry milk. ^{4/} Class III price for the second preceding month minus the computed Class II price for the second preceding month. If the computed Class II price was equal to or higher than the Class III price, there is no adjustment. ^{5/} This marketing area may not have had the same Class III price in a given month as other Group A markets. Consequently, the adjustment and Class II price may not always have been the same. ^{6/} Effective with April 1995 prices, a new methodology for determining Class II prices was instituted in all Federal milk orders with the exception of Paducah. Under the new provision, the Class II price is the basic formula price for the second preceding month plus a fixed differential of \$0.30. Paducah maintained the old pricing provision for April and May 1995 until adopting the new provision starting with the June 1995 price.

1/ This pricing provision is currently in effect in 27 marketing areas. See "Summary of Major Order Actions, December 1993" in FMOS-399 and table 2 in this report for the affected marketing areas. This price is applicable to producer milk used to produce nonfat dry milk.

2/ "Dairy Market News," AMS.

3/ This price series is used in the computation of the modified yield factor and Class III-A Prices in all but 3 of the 27 affected marketing areas. See 1/.

4/ This price series is used in the computation of the modified yield factor and Class III-A Prices in the western marketing areas. See 1/.

5/ 9 less (0.4 divided by the applicable nonfat dry milk price).

6/ (Butterfat differential times 35) plus [(applicable nonfat dry milk price less 12.5 cents) times the applicable modified yield factor].

7/ See 1/ to find the marketing areas that use this nonfat dry milk price series.

8/ New England, New York-New Jersey, and Middle Atlantic also use a seasonal adjustment in the computation of Class III-A prices.

* Not in effect. 1/ Based on prices at test as reported in "Agricultural Prices," NASS; converted to a 3.5 percent test by using the butterfat differential specified in Federal milk orders for conversion of the blend prices that vary from 3.5 percent. 2/ Average price reported paid to producers for manufacturing grade milk f.o.b. plants in Minnesota-Wisconsin as reported by NASS. Effective with the May 1995 price, this price series was replaced by the Basic Formula Price. 3/ Effective with the May 1995 price, the Basic Formula Price replaced the Minnesota-Wisconsin (M-W) price series, which establishes minimum prices under all Federal milk orders. The Basic Formula Price is the base month M-W price updated with a product price formula. See "Summary of Federal milk order actions, May 1995" in FMOS-408. 4/ "Agricultural Prices," NASS. 5/ Animals sold for dairy herd replacement only. 6/ Figures are published for January, April, July, and October only. 7/ Mid-month price. 8/ Includes beef cows and cull dairy cows sold for slaughter, but not dairy cows for herd replacement. 9/ Pounds of 16 percent mixed dairy feed equal in value to 1 pound of milk sold to plants. Since prices paid for feed items will now be reported annually in April, rather than quarterly, price ratios are calculated using a different procedure. The new methodology utilizes major raw feed component prices from the NASS agricultural commodity prices published monthly.

Summary of Federal Milk Order Actions, July 1995

Amendment and Merger:

Southeast - July 1 (60 FR 29436, 6/2/95). This action merges the Georgia, Alabama-West Florida, Greater Louisiana, New Orleans-Mississippi, Central Arkansas marketing areas, and includes previously unregulated counties in Arkansas, Georgia, Mississippi, and Tennessee.

The marketing area consists of 12 pricing zones with Class I differentials ranging from \$2.55 in northern Tennessee to \$3.65 in New Orleans. The Class I differential for the base zone, which includes Atlanta and Birmingham, is \$3.08.

The order provides for "unit pooling" of plants, a "lock-in" provision for a distributing plant located in the marketing area that meets the order's pooling standards, a procedure for the market administrator to adjust pooling standards and diversion limits, and a base-excess plan.

Termination:

Eastern Ohio-Western Pennsylvania - July 1 (60 FR 22255, 5/5/95). This action terminates the advertising and promotion program provisions of the Eastern Ohio-Western Pennsylvania Federal milk order. Termination of the provisions will be effective July 1, 1995, with the exception of the liquidation provision, which will be terminated effective August 1, 1995.

Summary of Federal Milk Order Actions, August 1995

Suspension:

Texas - August 1 (60 FR 40260, 8/8/95). This action suspends segments of the pool plant and producer milk definitions for this order for the months of August 1995 through July 1997.
